glimpse.

The reel.

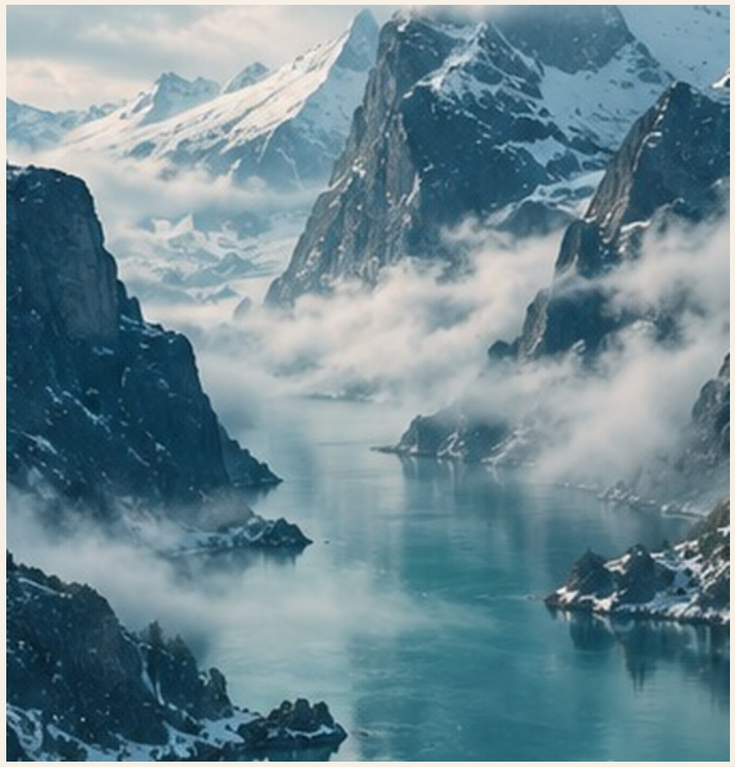

An identity built around tiny windows, small surprises, and the pleasure of seeing somewhere else.

3 DISTINCT DIRECTIONS

A little window into elsewhere.

The reel is a visual metaphor for discovery, not a compulsory interface.
A beautiful image appears; another is waiting just out of sight.

Photography stays the protagonist. The reel lends the app a signature rhythm.

01 / KEEPSAKE

The paper reel

Warm, nostalgic, imperfect in the right ways.
A collectible object, translated into a modern icon.

WHAT IT KEEPS

Cream card and ink-dark photo frames paired picture windows, a central hub, subtle registration details and a light sense of physical depth.

TACTILE

NOSTALGIC

EDITORIAL

02 / ORBIT

The modern reel

The essential geometry, nothing extraneous.
A confident app mark that survives reduction.

WHAT IT KEEPS

Seven graphic windows orbit one hub.
High-contrast silhouette; no tiny labels,
ornate texture or hardware imitation.
Works beautifully as a themed icon.

TIMELESS SCALABLE ANDROID-NATIVE

03 / COLOUR REEL

The colour reel

A vivid little carousel of photographs.
Every collection becomes its own miniature gallery.

WHAT IT KEEPS

Big windows and joyful colour contrast. The mark changes as the photos change, making every collection immediately recognizable and a little unpredictable.

EXPRESSIVE

PERSONAL

PHOTOGRAPHIC

Three personalities. One idea.

The three treatments share the same seven-stop silhouette.
They differ in how much material, detail and photography they reveal.

A / Keepsake

B / Orbit

C / Colour

expressive / personal

Does it hold at 24 pixels?

A visual identity has to survive the launcher, the status area, the widget and the monochrome Android themed-icon mask. Details that vanish do not count.

MONO

themed icon — one colour

A quiet frame for beautiful things.

The interface recedes. The photographs arrive.
A small reel motif ties the screens together without becoming visual clutter.

Paper

Deep teal

Coral

Sunlight

Sage

Iris

glimpse.

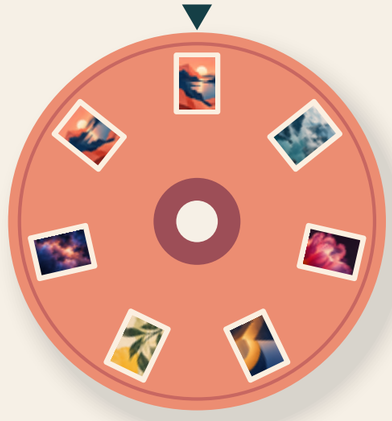

Something lovely, every time you look.

Lead with the view.

Open Glimpse to see the wallpaper, not a dashboard.
The reel identifies the active collection.

YOUR COLLECTION, AT A GLANCE

A tiny changing reel shows
where this image belongs.
One tap leads to its collection.

NO METAPHOR TAX

Next. Pause. Share. Familiar labels,
visible actions and honest timing.

Every collection has a face.

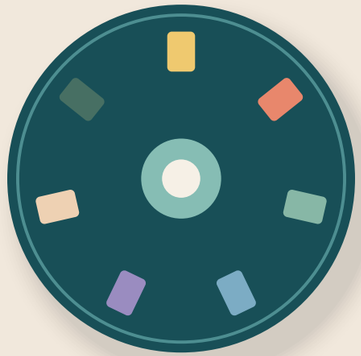

Your photos give each collection a distinctive face.
The photo grid is still one tap away for serious organizing.

Rainbows

Golden Hour

Quiet Places

View as: Reel covers • Photo grid • List

Look closer. Take it anywhere.

The image stays the hero, with useful actions one step away.

Find the same controls in the grid or wallpaper view.

ONE IMAGE. EVERY POSSIBILITY.

Set as wallpaper or save for later.

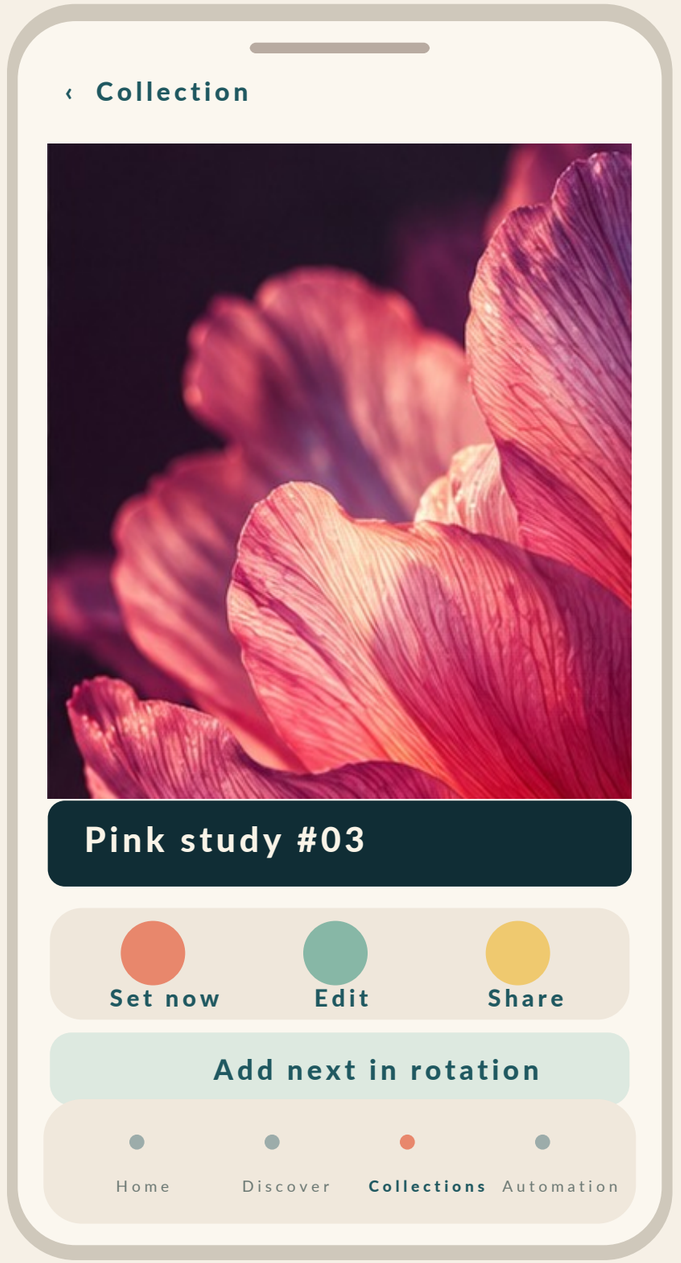

Share to chat, Drive, Lens or email.

Choose original or cropped version.

Even the lovely parts are optional.

A plain photo grid and familiar actions always remain.

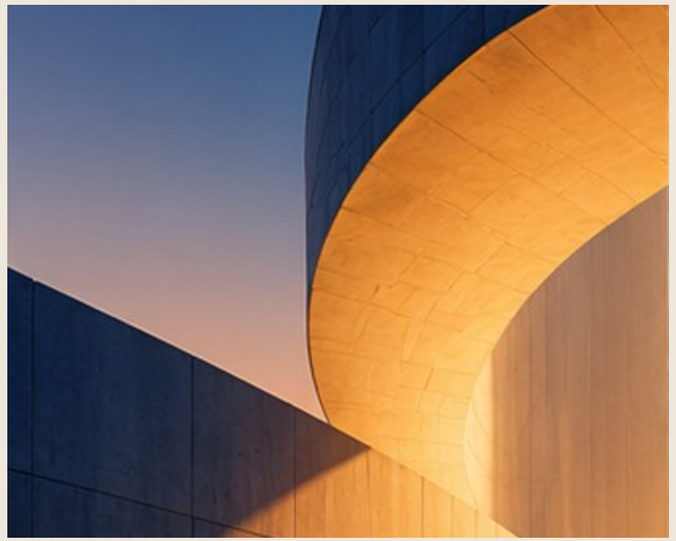

A screenshot becomes a wallpaper.

Share from Android. Straighten, rotate or crop. Then decide what happens next.
The reel is absent from the editor itself: the photograph needs the space.

1 Bring it in

Share or paste

2 Make it yours

Rotate, crop, position

3 Choose its place

Use now / Next / Save

PRESERVE THE ORIGINAL • RE-EDIT LATER • NEVER CHANGE THE QUEUE BY ACCIDENT

One satisfying click.

Advancing the image nudges the reel forward by one station.
It lasts a moment, then gets out of the way.

At rest

Reduced motion: crossfade or instant replacement. Haptics: optional. Sounds: never automatic.

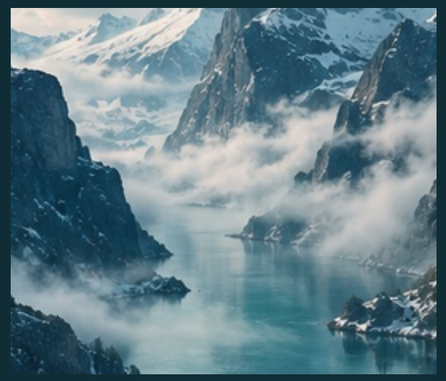

The motif scales beyond the app.

A small icon in the launcher, a compact action on the home screen,
a tasteful widget with today's view. All behave like native Android.

Glimpse

Adaptive masks • monochrome themed icons • accessible labels • no gratuitous animation

Playful, never cryptic.

The visual metaphor earns its place only when it helps recognition, memory or pleasure.
It must never turn common Android interactions into a puzzle.

01 ## Photographs first

Big images. Quiet surfaces.
Let collection art provide colour.

02 ## Ordinary verbs

Next, Shuffle, Crop, Share.
No “advance cartridge” nonsense.

03 ## Accessible by default

48dp targets. Clear focus.
No gesture-only reel interface.

04 ## Motion with restraint

140–240ms feedback.
Respect reduced motion.

One identity. Two modes.

My recommendation: keep the modern reel as the permanent app icon.
Let the photographic reel bloom on collection covers and in moments of discovery.

THE FIXED SIGNATURE

Orbit

Clean at small sizes.
Clear in monochrome.
Unmistakably Glimpse.

THE LIVING EXPRESSION

Colour

Each collection is unique.
Photographs, not ornaments.
A subtle rotation on Next.
